Dividing an office well means keeping the light and holding back the noise.

Glass Line's founders spent a combined forty years supplying high-end glazed partitioning systems around the world. They started Glass Line in Riyadh to do one thing: design, manufacture and install systems that meet European and American standards, without the long lead times of importing them.

We make the whole system ourselves, from the aluminium track to the glass doors, in our factory in Sudair Industrial City. The team that draws your partition installs it and comes back to service it, so a question never waits on a supplier abroad.

40
years of combined experience behind our founders

70+
people who draw, make and fit our systems

189
organisations with our glass in their offices

52
dB, the highest rating in our range

Made in the Kingdom

Designed in Riyadh, made in Sudair Industrial City, fitted by our own teams across Saudi Arabia.

MADE IN THE KINGDOM

Made here, installed here.

Local content certified by the Local Content and Government Procurement Authority.

Every system is produced in our own facility in Sudair Industrial City, north of Riyadh, and installed by our own teams in Riyadh, Jeddah, Dammam, Al Khobar and anywhere in the Kingdom. Supply, service, replacement panels and relocations are handled here, without an import wait.

SAUDI MADE

Saudi Made	The national Saudi Made mark, on every system we make.
Industrial licence	Manufacturing licensed by the Ministry of Industry and Mineral Resources.
ISO 9001:2015	Quality management for the supply and installation of glass partitioning.
ISO 14001:2015	Environmental management, for the same scope.
ISO 45001:2018	Occupational health and safety management.

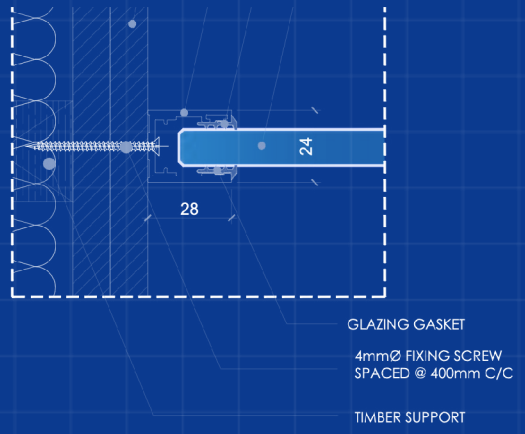

From drawing to handover, one team.

01	Survey and drawings	We measure the site and issue shop drawings for approval before anything is cut.
02	Manufacture	The system is produced in our own facility in Sudair Industrial City, to the approved drawings.
03	Install	Our own installers fit the system and hand over a finished product.
04	Service	Adjustments, replacement panels and relocations are handled locally, without an import wait.

The name is the width.

G-24, G-55 and G-102 are named after their aluminium track, in millimetres. A wider track holds two panes further apart, and the air between them is what holds the sound back.

INSIDE A G-24 AND A G-102 WALL

Single-pane or double-pane glazing for a quiet room.

Both walls taken apart, on the same scale. Every part and size comes from the section drawings in our catalogue; the gaps between the parts are opened up for clarity.

1. **Bulkhead**
   Holds the top channel above the finished ceiling.
2. **Top channel**
   Aluminium, 24 x 28 mm on G-24 and 102 x 28 mm on G-102.
3. **Glazing gaskets**
   On both faces of each pane, at the top and at the bottom.
4. **Acoustic laminated glass**
   13.52 mm panes: one on G-24, two on G-102.
5. **The cavity**
   G-102 only. The air between the panes holds the sound back.
6. **Clip-in bead**
   Clips into the bottom channel along the face of the glass.
7. **Shim / packing**
   Sets the height of the glass in the bottom channel.
8. **Bottom channel**
   The same section as the top channel, fixed to the floor.
9. **Acoustic foam**
   G-102 only. Strips over the top channel and under the bottom one.

G-24

Single glazed partition · Rw 33 to 38 dB

G-102

Double glazed partition · Rw 46 to 51 dB

SINGLE GLAZED PARTITION

G-24

Rw 33-38 dB

A slim single glazed wall that keeps the floor open and bright while taking the edge off office noise.

12 mm clear toughened	33 dB
13.52 mm acoustic laminated	38 dB

Configuration
Single glazed, mullion-free

Max partition height
3000 mm

Track
24 x 28 mm aluminium, top and bottom

Aluminium
Alloy 6063, temper T6

SINGLE GLAZED PARTITION · PLUS

G-24 Plus

Rw 40 dB

G-24 on a deeper 28 x 28 mm track, glazed with 17.52 mm acoustic laminated glass for a higher acoustic rating.

17.52 mm acoustic laminated	40 dB

Track
28 x 28 mm aluminium, top and bottom

Max partition height
3000 mm

Configuration
Single glazed, mullion-free

Aluminium
Alloy 6063, temper T6

DOUBLE GLAZED PARTITION

G-55

Rw 42-46 dB

Two panes of glass with an air gap between them. The room stays transparent and conversations stay inside it.

2 x 12 mm clear toughened	42 dB
2 x 13.52 mm acoustic laminated	46 dB

Configuration
Double glazed, mullion-free

Max partition height
3000 mm

Track
55 x 28 mm aluminium, top and bottom

Aluminium
Alloy 6063, temper T6

DOUBLE GLAZED PARTITION

G-102

Rw 46-51 dB

Our widest cavity and highest rating, for rooms where what is said must not be heard outside.

2 x 12 mm clear toughened	46 dB
13.52 mm acoustic laminated + 12 mm toughened	49 dB
2 x 13.52 mm acoustic laminated	51 dB

Configuration
Double glazed, mullion-free

Max partition height
3000 mm

Track
102 x 28 mm aluminium, top and bottom

Aluminium
Alloy 6063, temper T6

G-102 Plus

Rw 52 dB

The same 102 x 28 mm track as G-102, glazed with 2 x 17.52 mm acoustic laminated glass for a higher acoustic rating.

2 x 17.52 mm acoustic laminated	52 dB

Track
102 x 28 mm aluminium, top and bottom

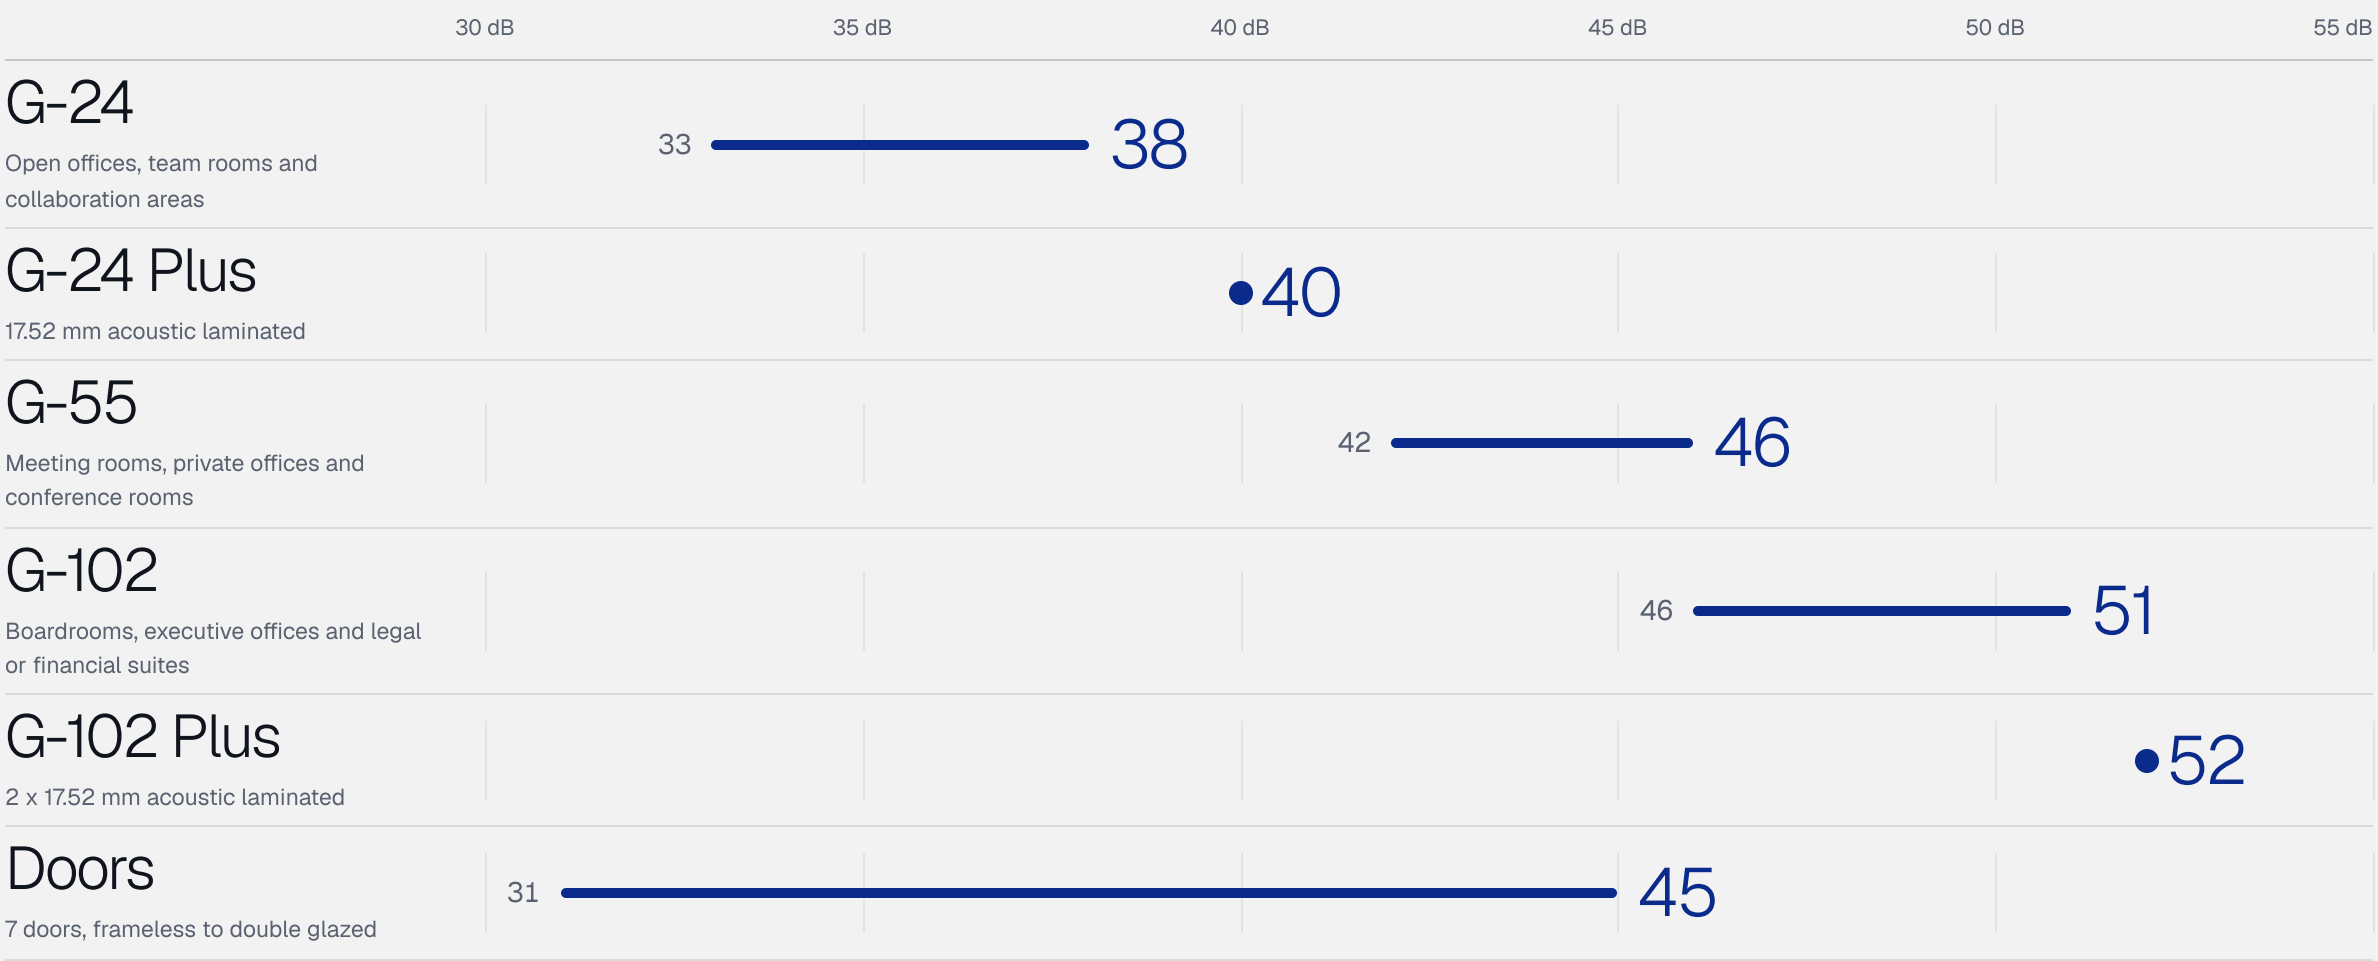

Max partition height
3000 mm

Configuration
Double glazed, mullion-free

Aluminium
Alloy 6063, temper T6

Choose the wall by how much sound it has to hold.

Rw ratings from our data sheets. For each partition the bar runs from standard toughened to acoustic laminated glass; for doors, from the lowest to the highest rated door.

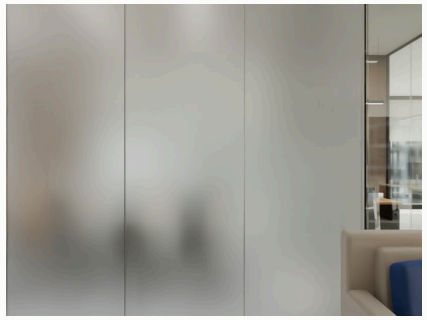

Choose the glass, then the frame.

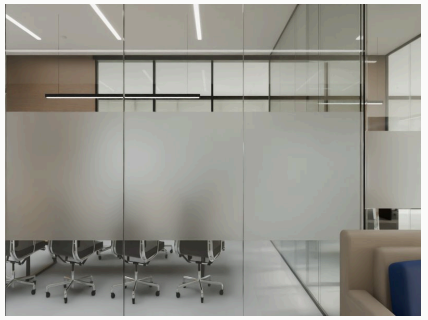

Clear

Fully transparent. The room stays part of the office.

Frosted

Daylight passes, the view does not.

Banded

A frosted band at eye level, for privacy when seated.

Switchable

Clear, then private at the press of a switch.

Frames powder coated to any RAL colour, for example:

- Jet black RAL 9005
- Anthracite RAL 7016
- Traffic white RAL 9016
- Chocolate RAL 8017

Doors and movable walls

Doors made for our own partitions, and walls that turn one hall into two rooms.

GLASS DOORS

A quiet room is only as good as its door.

Seven doors made to sit inside our own partitions: frameless and framed, single and double glazed, swinging on a floor spring or sliding on a top rail. Each comes with a 1200 mm pull handle and a frame powder coated to any RAL colour.

Sleek	Frameless single glass door	12 mm clear toughened	1015 x 3000 mm	33 dB
Linea Single	Framed single glass door	12 mm toughened or 13.52 mm laminated	1015 x 3000 mm	35-37 dB
Linea Double	Double glazed door	8 mm + 6 mm clear toughened	1015 / 1071 x 3000 mm	39 dB
Linea Double Prime	Double glazed door	8.8 mm acoustic laminated + 6 mm toughened	1015 / 1071 x 3000 mm	40 dB
Linea Plus	Double glazed door	12 mm + 8 mm clear toughened	1123 x 3000 mm	45 dB
Manual Sliding	Single glazed sliding door	12 mm clear toughened	1000 x 3000 mm	31 dB
Pocket Sliding	Single glazed sliding door	12 mm clear toughened	1000 x 3000 mm	31 dB

One hall. Or two rooms.

Panels run on a ceiling track and park in a stack when the hall is open. Sizes, ratings and track layouts are drawn for each hall: send us the plan and the ceiling height.

Solid movable wall

Opaque panels for full privacy

Telescopic panel closes the run tight

Melamine faced, other finishes on request

Glass movable wall

Double-skinned tempered glass

Structural sealant glazing, edge to edge

Telescopic panel closes the run tight

Daylight carries through when closed

Selected projects

Banks, law firms and headquarters in Riyadh, built with our three partition systems.

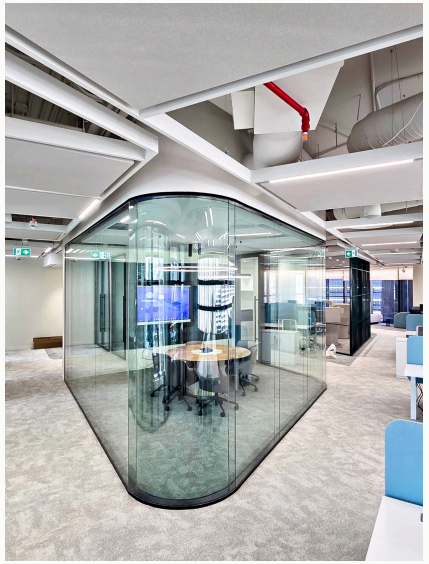

Glazed offices along a corridor, Riyadh
